The PRI Academic Network Conference 2020

The UN-supported Principles for Responsible Investment (PRI) works to understand the investment implications of environmental, social, and governance (ESG) factors and to support its international network of investor signatories in incorporating these factors into their investment and ownership decisions. The PRI acts in the long-term interests of its signatories, of the financial markets and economies in which they operate and ultimately of the environment and society as a whole. The conference will again be alongside PRI in Person, the largest global conference on responsible investment, and will be held on 5 October 2020 in Tokyo.

The PRI Academic Network is a vibrant and flourishing international community of over 4,000 academics and investment practitioners on ESG and investment. Academics are from RI-related disciplines, spanning accounting, economics, finance, law, management, sociology, and other subjects in the social and natural sciences.

The conference focuses on the latest research on responsible investment practices. The event is for academic researchers in sustainability and will also be an opportunity for academics and investors to engage with each other, learn and discuss the latest insights, and to network.

Call for Papers

Aligning with key themes at PRI in Person, we invite submissions of papers that focus on responsible investment, especially inviting submissions on the following topics:

The development of a sustainable financial system
- ESG investing and investment horizons
- Risk management in the context of RI
- ESG-related regulatory developments (for e.g. EU sustainable finance)
- Fiduciary duty
- Sustainable pension systems
- The role of financial regulators
- Transition Risks

The role of responsible investment in meeting global goals
- SDGs
- Investing for impact / outcomes
- Diversity and inclusion
- Lobbying
- Artificial intelligence
- Climate change
- Energy transition
- Biodiversity and Conservation
ESG integration
- Financial performance
- Fixed income and ESG investment performance
- Behavioural finance and investment biases: implications for RI

ESG engagement
- Corporate reporting (e.g. TCFD) and ESG disclosure
- Engagement strategies
- Hard to abate sectors and corporate emission reductions
- Incentives, corporate culture and long-term value creation

We encourage both theoretical and empirical contributions from diverse disciplines such as accounting, economics, finance, law, management, and other subjects in the social and natural sciences.
