

In 2016,
106 Americans were shot and killed every day.
4 children, under 10 years every week
8 adolescents, 10-19 years, every day
53 adults, 20-45 years, every day
28 adults, 45-65 years, every day
16 adults, over 66, years every day

Researchers at Boston University are conducting a study to understand gun violence and culture in the US. Any adult 18 years and older, who currently lives in the United States, can provide their year of birth, state and zip code of residence are eligible to participate.
