Research Study on Walking After a Stroke
Help us learn how to help people who have had a stroke walk faster, farther, and with less effort!

The Neuromotor Recovery Laboratory at Boston University is studying how people who have had a stroke walk.

Both stroke survivors and healthy adults without a stroke are needed!

We are looking for individuals who:

- Are between 21-80 years old
- Do not have any serious medical conditions (other than stroke)

This research study will involve multiple visits. During each visit, we will monitor how you move during walking-related activities. Photos and videos may be taken. You will receive a $25 gift card for each study visit you attend. Compensation for travel expenses may also be available.

To participate, contact our clinical research team:

Email: GAITLAB@BU.EDU
Phone: 617-358-3043
