PLEASE WRITE YOUR COMMENTS BELOW

6. What suggestions would you make to improve the second semester portion of the program?

I would like to find a way to get the students into the State House so they can develop a better understanding of the context in which their policy proposals will be debated. Learning how to draw attention to an innovative proposal and how to persuade policy makers that an initiative should be implemented might help them tailor the research they do.

7. What came to mind when answering question #5?

Making best use of this program and making the student's experience optimal requires a time commitment that this office is not always able to make.

8. What use do you anticipate you will be making of the deliverables provided by the student Law Office?

We will use it to draft legislation and to present proposals for new state policies around juvenile status offenders.
