

How to Navigate Rise 360

This training (also called a lesson) was built in Rise 360. You can access it by selecting 'Enroll' on the Course Description page. Once you open the training, you have multiple ways to progress through the content.

The Overview Page contains:

- Acknowledgements
- Interactive Table of Contents (clicking on a heading will bring you to that lesson page)
- Funding Attribution and Disclaimers
- "Start" button which brings you to the first page of the lesson

All other pages contain:

- A collapsible navigation panel, which, when expanded, lists all the sections of the training. Clicking on any heading will take you to that section. You can access the navigation panel by clicking on the light green toggle button  located on the top left corner of your screen.
- A 'Continue' button which you will need to click in order to move on to the next section.

Hyperlinks throughout the lesson will open in a new window, so you must go back to the lesson window to continue. Use the navigation options described above to move around the lesson.

Although you have the option of completing the lesson in any manner you wish, we recommend moving sequentially from page one through the last page. Knowledge checks, self-checks, and quizzes throughout the lesson are not scored – they are only used to reinforce your learning. If you answer incorrectly, you will receive feedback.

When you've completed the lesson, the last page contains a link to the post-test. You must complete the post-test and evaluation survey at the end to access your certificate.

Job aids are available for download at the end of the training and in the last column of the course table.
