

Assignment 7**First Draft of your Final Project.****Due November 20, 6 p.m.****Hard copy (including revised Project Description if appropriate) should be handed in during class, put under Prof. Kahn's door (518C) or in Prof. Kahn's mailbox (531)****Replace your dataset on the google drive if it has changed since last posted****<https://tinyurl.com/qm222a1>**

(Worth ½ point if completed and handed in on time; late assignments lose 5% per day)

Complete a draft of your final project, update the Project Description for anything that has changed (e.g. if your list of variables has changed), and post your final dataset online. You may even choose to use the Codebook as a table in your project.

I give extensive feedback and suggestions on this draft if you hand it in on time. I also give a preliminary grade (if you never handed in an additional draft) and a target grade that you could achieve if you incorporate my suggestions.

Students tend to get a *much* better grade if they get comments in time to incorporate suggested changes. In fact, it is very very rare (2 cases in 3 years) to get a really good grade based on the first draft alone.

If you hand your draft in by November 20, then I will get you my feedback on or before Monday December 4.

If you hand your draft in by December 4, I will get you this feedback back to you by Monday December 11 at the latest.

If you hand in your draft after December 4, I will do what I can but cannot promise a full set of comments.

The more complete the first draft, the better feedback I can give you. However, there are only 24 hours in a day and I only have the time to read ONE DRAFT FOR ANY STUDENT.

I give feedback in the order that I receive the drafts.

When you hand in your draft, please let me know if you have not yet edited it yourself for style, English, etc., and I will only give you feedback on the content.
