

## Creative Commons License Conditions

- **Attribution** – licensee must attribute the work in the manner specified by the author or licensor
- **Share-Alike** – can only distribute derivative works only under a license identical to the license that governs the original work
- **Non-Commercial** – work can't be intended for or directed towards commercial advantage or monetary compensation
- **No Derivative Works** – licensees may copy, distribute and perform only verbatim copies of the work

## OSS Terminology

- **Larger work** – program developed by the licensee that includes the OSS licensed code
- **OSS licensed code** – original code licensed under an open source license
- **Permissive** – license with minimal requirements about how software can be redistributed
- **Hereditary** – a license that applies to the OSS licensed code and any software integrated with the OSS licensed code in a larger work
- **Copyleft** – a provision that requires source code to be made freely available downstream
- **Downstream** – code that's distributed as source code and incorporated into software
- **Dynamic linking** – method of combining binary objects at runtime, the object is loaded into memory when requested by the program and erased when it's no longer needed
- **Static linking** – a method of combining binary objects at compile time, it forms a single executable when the program is run and remains in memory the entire time the program is in operation

## Summary of OSS Licenses

	MIT	Apache	MPL	GPLv3	AGPL
<b>License Type</b>	Permissive	Permissive	Copyleft	Copyleft	Copyleft
<b>Attribution</b>	Must include copyright notice in downstream works	Must include copyright notice in downstream works	Must include copyright notice in downstream works	Must include copyright notice in downstream works	Must include copyright notice in downstream works
<b>Modification</b>	Allowed without restrictions	Allowed but licensee must include a notice stating that changes were made to the OSS licensed code	Allowed if modified source code is disclosed when software is distributed and if modifications are also licensed under MPL	Allowed if modified source code** is disclosed when software is distributed and if licensee provides notice that changes were made	Allowed if modified source code** is disclosed when software is distributed (includes distribution over a network) and if licensee provides notice that changes were made
<b>Commercial Use</b>	Allowed	Allowed	Allowed	Allowed	Allowed
<b>Distribution</b>	Allowed	Allowed	Allowed	Allowed but cannot distribute copies or beta versions under an NDA	Allowed but cannot distribute copies or beta versions under an NDA
<b>Hereditary</b>	No	No	No	Yes	Yes

\*\* Since these licenses are hereditary, the modified source code technically includes any parts of the larger work that touch the OSS licensed code.
