

Statistical Genetics Seminar Series

Date	Topic	Presenter
9/15/2023	Methods for the formal comparison of polygenic scores in multiple populations	Sophia Gunn, PhD
10/6/2023	Splicing regulation, splice variants, and human disease	Jiuyong Xie, U of Manitoba
10/20/2023	Genetic architecture of complex traits across East Asian and European ancestries: novel methods and emerging resources	Hailiang Huang, HMS, MGH, Broad Institute
11/3/2023	CANCELLED - ASHG	
11/17/2023	Information-incorporated sparse convex clustering for disease subtyping	Xiaoyu Zhang, BU
12/1/2023	Diversity and Scale: Genetic Architecture of 2,068 Traits in the VA Million Veteran Program	Jennifer E Huffman, VA
12/15/2023	CANCELLED - End of semester	
1/5/2024	CANCELLED - INTERSESSION	
1/19/2024	Mendelian Randomization: easy R coding but complicated Statistics and Genetics	Jie Huang
2/2/2024	Canonical Distance Correlation Analysis with Applications to Metabolite Data	Peitao Wu
2/16/2024	QTLs mapping across tissues and cell types reveals context-specific genetic regulation in psychiatric and neurodegenerative diseases	Lei Hou
3/1/2024	GWAS of Disease Progression	Nimish Adhikari, BUSPH
3/15/2024	Cancelled -spring break	
4/5/2024	CANCELLED - CUPPLES AWARD DAY BEFORE	
4/19/2024	Methodological Advances and Applications of Polygenic Risk Score	Jin Jin, Penn
5/3/2024	CANCELLED - End of semester	
5/17/2024	Associations between rare-variants and cardiopulmonary diseases in the All of Us data	Jingwen Zhang, BU
